DETAILED ACTION

Election/Restrictions

1. Applicant's election of the species shown in Figs. 1-5 in the reply filed on 17 June 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 10-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 17 June 2004.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Viehweger, Jr.

Viehweger, Jr. discloses a landing gear system for a trailer comprising: a pair of vertically adjustable legs 18 attached to a trailer, a hydraulic motor 94 (see col. 2 lines 52-54) having a pair of rotational outputs, and a pair of landing gear drive shafts 29,30, each rotationally engaging one of the respective lifts and one of the respective rotational outputs to vertically

adjust the lifts, wherein each rotational output rotates at a substantially equal rate to vertically adjust the lifts at substantially the same rate, wherein the hydraulic motor further includes a drive shaft 34 to which each rotational output is connected, wherein the drive shaft and rotational outputs are formed as an integral one piece member 34, wherein the landing gear drive shafts each have a longitudinal axis and the rotational outputs each have a longitudinal axis substantially coaxial with the longitudinal axes of the drive shafts.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 7-9, 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Viehweger, Jr. in view of Grace.

Viehweger, Jr. discloses the claimed invention except for an electrically driven hydraulic pump and a relief valve.

Such elements are known in the art as part of a hydraulic fluid delivery system, for example as shown by Grace including an electrically driven hydraulic pump 35 and a relief valve 71.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Viehweger, Jr. by using the hydraulic fluid delivery system disclosed by

Art Unit: 3611

Grace, in order to provide hydraulic fluid to the hydraulic motor.

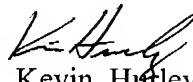

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose semi trailer landing gear systems.
